

OPENWORKS

FEBRUARY 25-27, 2019 • NEW YORK

Why Attend MariaDB OpenWorks?

Mark February 25-27, 2019 on your calendar! That's when MariaDB customers, community members and the teams that build MariaDB technology will gather in New York City for MariaDB OpenWorks. Here are eight reasons you should join the festivities.

1. Learn from 60+ Technical Sessions

No matter what your focus area or experience level, OpenWorks has something for you. Participate in your choice of 60+ sessions across five themed tracks:

- » **Real World Case Studies:** Hear directly from MariaDB customers about why they chose MariaDB, their current and future use cases, their technical requirements and what they've learned.
- » **Product Internals and Roadmap:** Look under the hood with MariaDB engineers and product managers – see how things work and get a peek at what's coming in the future, including DBaaS, machine learning and MariaDB Manager.
- » **Operations and Infrastructure:** Explore best practices for migration, containerization, HA/DR, performance, scalability and security.
- » **Modern App Development:** Learn to build web, mobile and IoT apps and microservices in Java, .NET and Node.js – and how to write powerful queries with ease.
- » **Scalable Interactive Analytics:** See how to use MariaDB's distributed, columnar analytics database for massive-scale interactive queries (and no indexes) – and how to incorporate streaming data and machine learning with Apache Kafka and Spark.

2. Dive Deep on Workshop Day

In response to last year's sold-out half-day workshops, we've dedicated the entire first day of the show – Feb. 25 – to workshops. Choose two half-day workshops, and get ready to dive deep.

High Availability	Advanced Security	Performance Tuning
Modern Analytics	Oracle Migration	Container Deployments

3. Get Certified

OpenWorks is the only place to test your skills with the **MariaDB Certified Database Administrator Associate Exam**. Beef up your knowledge on workshop day, Feb. 25, then prove your expertise at configuring, troubleshooting and tuning MariaDB databases. The 90-minute exam is offered free of charge and on a first-come, first-served basis.

4. Ask the Experts

Have a question you've been meaning to ask or an idea you'd like a MariaDB expert to weigh in on? Drop by our Expert Bar to talk with a MariaDB solutions engineer. And don't forget to pick up some swag while you're there!

5. Network with Your MariaDB Community

Connect with friends new and old from around the world, talk with your favorite speakers, exchange ideas and share your MariaDB experience.

6. Eat, Drink and Be Merry

We'll keep you going strong with lunches, plus snacks and refreshments whenever you want them. And after a full day of technical education, treat yourself to drinks and bites at our on-site cocktail party the evening of Feb. 26.

7. Recharge

Between sessions, take time to recharge your devices – and yourself – at our Recharge Station. There'll be power ports of every kind, plus vitamin packets, healthy snacks, mints, stress balls and more to keep you relaxed and focused.

8. Explore NYC

New York is "the city that never sleeps." Take advantage of the endless opportunities to experience the city's parks, theaters, historic neighborhoods and exciting food scene.

There are three pass types to choose from. Reserve yours today at: mariadb.com/openworks.
