

MariaDB OPENWORKS

MAY 4-6, 2020 • NEW YORK

Why Attend MariaDB OpenWorks?

Mark May 4-6, 2020, on your calendar! That's when MariaDB customers, community members and the teams that build MariaDB technology will gather in New York City for MariaDB OpenWorks. If you're still not sure whether the conference is for you, read on for eight great reasons to join in the fun.

1. Learn from 50+ Technical Sessions

No matter what your focus area or experience level, OpenWorks has something for you. Participate in your choice of 50+ sessions across six themed tracks.

- » **Real World Use Cases:** Watch MariaDB customers share their stories of why they chose MariaDB, how they're using it, their technical requirements, and insights they've gained.
- » **Cloud Deployment:** Get to know the ultimate MariaDB cloud, SkySQL, and see how easy it is to use the first DBaaS built and optimized for MariaDB Platform.
- » **Product Internals and Roadmap:** Look under the hood with MariaDB engineers and product managers – see how things work and get a peek at what's coming in the future.
- » **Operations and Infrastructure:** Explore best practices for migration, containerization, cloud deployments, HA/DR, performance, scalability and security.
- » **Development for Modern Applications:** Learn to build web, mobile and IoT apps and microservices in Java, .NET and Node.js – and how to write powerful queries with ease.
- » **Scalable Interactive Analytics:** See how to use MariaDB ColumnStore to conduct "smart transactions" by storing data in both row and columnar formats – without needing separate databases for transactions and analytics.

2. Choose from More Workshops than Ever Before

The first day of the show is dedicated to workshops – and this year we're featuring even more of them by popular demand. Choose two half-day workshops, and get ready to dive deep.

Fundamentals: Getting to know MariaDB Platform	Step-by-step: Migrating from proprietary databases	Best practices: Deploying in secure environments
Taking SkySQL for a spin	Best practices: Running databases at full speed	Best practices: Zero-interruption high availability
Advanced: Enabling hybrid transactional/analytical processing	Extreme scalability with ClustrixDB	Certification prep & exam

3. Get Certified

OpenWorks is a great place to demonstrate your expertise by taking the **MariaDB Certified Database Administrator Associate Exam**. Beef up your knowledge on workshop day, May 4, then prove your mastery of configuring, troubleshooting and tuning MariaDB databases. The two-hour exam is offered free of charge and on a first-come, first-served basis.

4. Ask the Experts

What questions are on your mind? Do you have an idea that could benefit from expert input? Drop by our Expert Bar to talk with a MariaDB solutions engineer. And don't forget to pick up some swag while you're there!

5. Network and Collaborate with Your MariaDB Community

Connect with friends new and old from around the world, talk with your favorite speakers, exchange ideas and share your MariaDB experience. And take things a step further with informal "birds of a feather" gatherings on topics such as using Galera, choosing a storage engine, and the realities of migration.

6. Eat, Drink and Be Merry

Your conference pass includes lunches, plus snacks and refreshments throughout the day. And after a full day of technical education, kick back with drinks and bites at our on-site cocktail party the evening of May 5.

7. Rest and Recharge

Between sessions, take time to recharge your devices – and yourself – at our Recharge Bar. The crowd-favorite massage chairs will be ready and waiting for you, along with power ports of every kind. You can also look forward to vitamin packets, healthy snacks, mints, stress balls and more to keep you relaxed and focused.

8. Explore NYC in Springtime

New York is "the city that never sleeps" – and spring is the perfect time to enjoy all it has to offer. Take advantage of the endless opportunities to experience the city's parks, theaters, historic neighborhoods and renowned food scene.

Reserve your conference passes and hotel stay today: mariadb.com/openworks.
