About MariaDB

MariaDB frees companies from the costs, constraints and complexity of proprietary databases, enabling them to reinvest in what matters most – rapidly developing innovative, customer-facing applications. MariaDB uses pluggable, purpose-built storage engines to support workloads that previously required a variety of specialized databases. With complexity and constraints eliminated, enterprises can now depend on a single complete database for all their needs, whether on commodity hardware or their cloud of choice. Deployed in minutes for transactional or analytical use cases, MariaDB delivers unmatched operational agility without sacrificing key enterprise features including real ACID compliance and full SQL. Trusted by organizations such as Deutsche Bank, DBS Bank, Nasdaq, Red Hat, The Home Depot, ServiceNow and Verizon – MariaDB meets the same core requirements as proprietary databases at a fraction of the cost. No wonder it’s the fastest growing open source database.

MariaDB at a Glance

Tens of millions of users worldwide

Fastest growing database
Growing partner ecosystem
Amount saved by migrating from Oracle

Customers

MariaDB Solutions

MariaDB TX
MariaDB AX

MariaDB Services

Remote DBA
Enterprise Architect
