Engineering Policy

Contents

1 Operating Systems Support, and Deprecation Policies **2**
- 1.1 Supported Products . . . 2
- 1.2 Supported Operating Systems . . . 2
- 1.3 Minor Version Compatibility . . . 2
- 1.4 Standard Support . . . 3
- 1.5 Extended Support . . . 3
- 1.6 Technical Support for MariaDB Products on Deprecated Platforms . . . 3

2 MariaDB Server **4**
- 2.1 Support of Storage Engines and Plugins . . . 4
- 2.2 MariaDB Enterprise Server . . . 4
- 2.3 MariaDB Enterprise Server components with limited OS coverage . . . 6
- 2.4 MariaDB Community Server . . . 7

3 MariaDB MaxScale **8**

4 MariaDB GridGain **10**

5 MariaDB Connectors **11**
- 5.1 Support duration and minor version compatibility . . . 11
- 5.2 MariaDB Connector/J . . . 11
- 5.3 MariaDB Connector/ODBC . . . 12
- 5.4 MariaDB Connector/C . . . 13
- 5.5 MariaDB Connector/C++ . . . 14
- 5.6 MariaDB Connector/Node.js . . . 15
- 5.7 MariaDB Connector/Python . . . 16
- 5.8 MariaDB Connector/R2DBC . . . 17

6 MariaDB Enterprise Tools **18**
- 6.1 MariaDB Enterprise Manager . . . 18
- 6.2 MariaDB Enterprise Kubernetes Operator . . . 20
- 6.3 MariaDB AI Plugins, Shell, and MCP Server . . . 21
- 6.4 MariaDB GridGain Control Center . . . 21

7 Appendix **22**
- 7.1 Versioning Scheme . . . 22
- 7.2 Limited Preview and Public Preview (Pre-GA) Product Maturity . . . 23
- 7.3 Plugin & Storage Engine Maturity . . . 23
- 7.4 Maintenance Releases Schedule . . . 24
- 7.5 Product Release Series no longer supported . . . 24
- 7.6 Security Bug Fixing Policy . . . 27
- 7.7 Engineering Policy Changes . . . 27

1 Operating Systems Support, and Deprecation Policies

1.1 Supported Products

MariaDB plc offers support for all products listed in this document following the timelines set forth in the document. Support is only provided for packages and delivery mechanisms provided directly by MariaDB plc. Should a bundled third-party package become unmaintained upstream, MariaDB plc will maintain a fork or transition to a supported alternative.

1.2 Supported Operating Systems

MariaDB plc intends to support all of the most used operating systems and Linux distributions among our customers.

Our policy is that when a distribution or an operating system stops receiving security and other updates, we will deprecate that platform and stop providing binary packages across all MariaDB products and release series. To get more information about the maintenance and depreciation policies for those operating systems, please consult the following information pages:

- Red Hat Release Information (RHEL in this document)
- Ubuntu Release Information
- Debian Release Information
- SUSE Enterprise Release Information (SLES in this document)
- Windows Client Lifecycle Information
- Windows Server Lifecycle Information

When a Java, Node.js, or Python version stops receiving security and other updates, it becomes difficult for MariaDB plc to provide a MariaDB Connector for that version. In this case, our policy is to deprecate an affected MariaDB Connector. To get more information about the maintenance and depreciation policies for Java, Node.js or Python, please consult the following information pages:

- Oracle Java SE Support Roadmap
- Node.js Releases
- Python End of Life branches / Status of Python branches

1.3 Minor Version Compatibility

MariaDB in general follows semantic versioning, ensuring that minor versions within the same major release remain backwards compatible. Minor versions include bug fixes, security patches, and performance improvements while maintaining API and protocol stability.

1.4 Standard Support

During the standard support period, the engineering team actively maintains the product by addressing bugs, providing security fixes, and ensuring compatibility with stated programming languages and operating systems. While issues are triaged and considered for resolution, fixes are not guaranteed. This phase includes regular updates and enhancements as needed. Once standard support ends, customers may need to transition to extended support (if available) for continued security updates until the product reaches its End-of-Life (EOL) date.

1.5 Extended Support

When the standard support window ends a product reaches the Extended Support phase. During the Extended Support phase the product gets security fixes and highly critical bug fixes until the product reaches its End-Of-Life (EOL) date. After the EOL date, MariaDB plc ceases to maintain the product. Customers wanting support for their MariaDB Products during the Extended Support phase can get that for additional fees from MariaDB plc.

1.6 Technical Support for MariaDB Products on Deprecated Platforms

In cases where customers want to continue production use of an operating system or deprecated Linux distribution, MariaDB plc can provide packages or support for older versions of MariaDB upon special request and under a separate contract.

For Platforms not listed as supported by MariaDB plc, only Commercially Reasonable Effort Support is provided (as defined by MariaDB plc Support Policy), and MariaDB does not provide regular binaries or packages.

2 MariaDB Server

2.1 Support of Storage Engines and Plugins

All Storage Engines and Plugins that are part of MariaDB Enterprise Server are supported as part of MariaDB Enterprise Server except the components that are in the `/unsupported` directory. This also means that all storage engines and plugins that are loaded by default in a specific release of MariaDB Enterprise Server are supported. In general the lifecycle of the components follows the life cycle of the MariaDB Enterprise Server release series in question, except where specifically noted otherwise.

2.2 MariaDB Enterprise Server

Release Series

Version	Stable (GA) Date	End of Standard Support	End of Life Date
10.6	23 August 2021	23 August 2027 [1]	23 August 2029
11.4	16 January 2025	16 January 2030 [1]	16 January 2033
11.8	22 October 2025	22 October 2030 [1]	22 October 2033
12.3	3 November 2026	3 November 2031 [1]	3 November 2034

1. Contact Sales for Extended Support

Supported Operating Systems

Operating System		10.6	11.4	11.8	12.3
RHEL	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Rocky Linux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
AlmaLinux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Oracle Linux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	24.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	26.04			X86_64, ARM64	X86_64, ARM64
Debian	12	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	13			X86_64, ARM64	X86_64, ARM64
Windows [2]		X86_64	X86_64	X86_64	X86_64
SLES	12	X86_64			
	15	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

Note: We may only provide binaries for the latest major MariaDB Enterprise Server GA version when a new operating system release goes GA, or a new service pack is available.

1. Supported using RHEL packages

2. Until the product reaches the Mainstream Support End Date

Supported Enterprise Docker Images

Operating System		10.6	11.4	11.8	12.3
Red Hat UBI via Docker images	9	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE

2.3 MariaDB Enterprise Server components with limited OS coverage

Supported Operating Systems

MariaDB Galera Cluster / MariaDB Raft Cluster					
Operating System		**10.6**	**11.4**	**11.8**	**12.3**
RHEL	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Rocky Linux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
AlmaLinux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Oracle Linux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10		X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	24.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	26.04			X86_64, ARM64	X86_64, ARM64
Debian	12	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	13			X86_64, ARM64	X86_64, ARM64
SLES	12	X86_64			
	15	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

1. Supported using RHEL packages.

Supported Operating Systems

MariaDB Enterprise (ColumnStore)				
Operating System		**23.02** [6]	**23.10** [2]	**25.10** [3]
RHEL	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10	X	X86_64, ARM64	X86_64, ARM64
Rocky Linux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10	X	X86_64, ARM64	X86_64, ARM64
AlmaLinux [1]	8	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	10	X	X86_64, ARM64	X86_64, ARM64
Oracle Linux [4]	8, 9, 10	X	X	X
Ubuntu (LTS)	22.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	24.04	X	X86_64, ARM64	X86_64, ARM64
	26.04	X	X	X86_64, ARM64
Debian	12	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	13	X86_64, ARM64	X	X86_64, ARM64 [5]

1. Supported using RHEL packages on AlmaLinux and Rocky Linux.

2. MariaDB Enterprise ColumnStore 23.10 is only available with MariaDB Enterprise Server 11.4.3-1 to 11.4.8-5, and 10.6.16-11 to 10.6.24-20.

3. MariaDB Enterprise ColumnStore 25.10 is only available with MariaDB Enterprise Server 10.6.25+, 11.4.9+, 11.8.3+, and later.

4. Despite Oracle Linux packages being served with MariaDB Enterprise Server, at this time they are not officially supported.

5. MariaDB Enterprise ColumnStore 25.10 Debian 13+ is only available with MariaDB Enterprise Server 11.8+

6. 23.02 is not being built for new MariaDB versions, just patched for criticals+ pertaining to ColumnStore packages only

2.4 MariaDB Community Server

MariaDB Community Server is excluded from our Supported Products. MariaDB plc provides no Engineering Support, supported binaries, maintenance releases, bug fixes, security patches, hotfixes, custom builds, or backports for it. Full Support Services require upgrading to a supported MariaDB Enterprise Server release series.

3 MariaDB MaxScale

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
23.02	March 2023	01 January 2027	01 March 2027
23.08	August 2023	01 August 2027	01 August 2027
24.02	March 2024	01 March 2028	01 March 2028
25.01	January 2025	16 January 2030	16 January 2033
25.10	October 2025	22 October 2030	22 October 2033
26.10	October 2026	22 October 2031	22 October 2034

Supported Operating Systems

Operating System [1]		23.02	23.08	24.02	25.01	25.10	26.10
RHEL [2]	8, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE
Rocky Linux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
AlmaLinux [2]	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Oracle Linux [2]	8, 9	X	X	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04, 24.04, 26.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Debian	12, 13	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
SLES	15	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

1. Both a package and a tarfile are provided for each supported operating system

2. Supported using Rocky Linux packages on AlmaLinux, Oracle Linux, and RHEL

Supported Enterprise Docker Images

Operating System		23.08	24.02	25.01	25.10	26.10
Red Hat UBI via Docker images	9	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE	X86_64, ARM64, PPC64LE

4 MariaDB GridGain

MariaDB GridGain is planned to have an annual release series for which we in general have 3 years of standard support followed by an extended support period.

Release Series

Version	Stable (GA) Date	End of Standard Support	End of Life Date
8.9	4 October 2023	April 2028	April 2030
8.10 [1]	3 November 2026	3 November 2029	3 November 2032
9.1	9 May 2025	April 2028	April 2028

1. MariaDB GridGain 8.10 does not have a Community Edition

5 MariaDB Connectors

5.1 Support duration and minor version compatibility

For the connectors we provide five years of standard support from the connector's general availability date, followed by three years of extended support. The connectors follow the semantic versioning standards, so that applications using a connector can safely upgrade to a newer minor version without requiring code changes, as long as they remain within the same major version. For example, an application using Connector/J 3.4 can upgrade to Connector/J 3.6 without modifications. However, upgrading to a new major version (e.g., from 2.x to 3.x) may introduce breaking changes and require adjustments.

5.2 MariaDB Connector/J

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
2.7	September 2020	September 2026	September 2026
3.3	November 2023	September 2028 [1, 2]	September 2031 [3]
3.4	May 2024	September 2028 [1, 2]	September 2031 [3]
3.5	October 2024	October 2029 [1, 2]	September 2031 [4]
4.0	November 2026	September 2030 [1, 2]	September 2033 [5]

1. Contact Sales for Extended Support.
2. End of Standard Support (EOSS) date based on 5 year support or the Oracle Java SE Support Roadmap - "Premier Support".
3. End of Life (EOL) date based on Oracle Java SE Support Roadmap - "Extended Support".
4. Potentially extended to 2032 if Java 25 LTS is compatible with 3.5.
5. Potentially extended if Java 29 LTS is compatible with 4.0.

Java Supported Versions

Java LTS Version	2.7	3.3	3.4	3.5	4.0
8	✓	✓	✓	✓ [1]	X
11	✓	✓	✓	✓ [1]	X
17	✓ [1]	✓	✓	✓	✓
21	X	✓	✓	✓	✓
25	X	✓	✓	✓	✓

1. Does not support the PARSEC Authentication Plugin.

5.3 MariaDB Connector/ODBC

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
3.1	May 2019	June 2025 [1]	June 2027
3.2	June 2024	June 2029 [1]	June 2032

1. Contact Sales for Extended Support.

Supported Operating Systems

Operating System		3.1	3.2
RHEL	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
Rocky Linux [1]	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
AlmaLinux [1]	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04	X86_64, ARM64	X86_64, ARM64
	24.04	X86_64, ARM64	X86_64, ARM64
	26.04	X86_64, ARM64	X86_64, ARM64
Debian	12	X86_64, ARM64	X86_64, ARM64
	13	X86_64, ARM64	X86_64, ARM64
SLES	12	X86_64, ARM64	X86_64, ARM64
	15	X86_64	X86_64
Windows [2]		X86_64, X86_32	X86_64, X86_32
macOS		X86_64	X86_64

1. Supported using RHEL packages on AlmaLinux and Rocky Linux.

2. Until the product reaches the Mainstream Support End Date.

5.4 MariaDB Connector/C

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
3.3	July 2022	July 2027 [1]	August 2029 [2]
3.4	February 2025	February 2030 [1]	January 2033 [2]

1. Contact Sales for Extended Support.

2. End of Standard Support is coupled with MariaDB Enterprise Server support, and end of life support is coupled with MariaDB Enterprise Server end of life.

Supported Operating Systems

Operating System		3.3	3.4
RHEL	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
Rocky Linux [1]	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
AlmaLinux [1]	8	X86_64, ARM64	X86_64, ARM64
	9	X86_64, ARM64	X86_64, ARM64
	10	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04	X86_64, ARM64	X86_64, ARM64
	24.04	X86_64, ARM64	X86_64, ARM64
	26.04	X86_64, ARM64	X86_64, ARM64
Debian	12	X86_64, ARM64	X86_64, ARM64
	13	X86_64, ARM64	X86_64, ARM64
SLES	12	X86_64, ARM64	X86_64, ARM64
	15	X86_64	X86_64
Generic Linux		X86_64	X86_64
Windows [2]		X86_64, X86_32	X86_64, X86_32

1. Supported using RHEL packages on AlmaLinux and Rocky Linux.

2. Until the product reaches the Mainstream Support End Date.

5.5 MariaDB Connector/C++

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
1.0	March 2021	March 2026	March 2029
1.1	February 2024	February 2029 [1]	February 2032

1. Contact Sales for Extended Support

Supported Operating Systems

Operating System		1.0	1.1
RHEL	8	X86_64, ARM64	X86_64, ARM64

	15	X86_64	X86_64
Windows [2]		X86_64	X86_64

1. Supported using RHEL packages on AlmaLinux and Rocky Linux.

2. Until the product reaches the Mainstream Support End Date.

5.6 MariaDB Connector/Node.js

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
3.2	June 2023	October 2027 [1, 2]	April 2029 [2, 3]
3.3	March 2024	October 2027 [1, 2]	April 2029 [2, 3]
3.4	October 2024	October 2027 [1, 2]	April 2029 [2, 3]
3.5	February 2026	October 2027 [1, 2]	April 2029 [2, 3]

1. Contact Sales for Extended Support.

2. May be extended if Node.js 27+ proves compatible.

3. Based on Node.js 26 EOL.

Supported Node.js Versions

Node.js LTS Version	3.2	3.3	3.4	3.5
22	✓	✓	✓	✓
24	✓	✓	✓	✓
26	✓	✓	✓	✓

5.7 MariaDB Connector/Python

Supported Python Versions

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
1.1	June 2022	June 2027 [1]	October 2029 [2]

1. Contact Sales for Extended Support.

2. Based on Python 3.13 EOL.

Supported Python Versions

Python Implementation	Python Version	1.1 [1]
CPython	3.9	✓
	3.10	✓
	3.11	✓
	3.12	✓
	3.13	✓
	3.14	✓
PyPy, Jython	X	X

1. For supported Operating Systems, see MariaDB Connector/C 3.4, which is required for MariaDB Connector/Python 1.1.

5.8 MariaDB Connector/R2DBC

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
1.2 - 1.0 Spec	February 2024	February 2029 [1]	September 2031 [2]
1.2 - 0.9 Spec [3]	September 2024	December 2026 [4]	December 2026 [4]
1.3 - 1.0 Spec	October 2024	October 2029 [1]	September 2031 [2]
1.3 - 0.9 Spec [3]	October 2024	December 2026 [4]	December 2026 [4]
1.4 - 1.0 Spec	February 2026	October 2029 [1]	September 2031 [2]

1. EOL date based on the Oracle Java SE Support Roadmap - "Premier Support".

2. EOL date based on Oracle Java SE Support Roadmap - "Extended Support".

3. Package org.mariadb:r2dbc-mariadb-0.9.1-spec is specifically supported for R2DBC 0.9.1 specifications.

4. Based on Spring Boot 2.7 end of enterprise support.

Java Supported Versions

Java Version	1.1	1.2	1.3	1.4
8	✓	✓	✓ [1]	X
11	✓	✓	✓ [1]	X
17	✓	✓	✓	✓
21	✓	✓	✓	✓
25	✓	✓	✓	✓

1. Does not support the PARSEC Authentication Plugin.

 All rights reserved.

6 MariaDB Enterprise Tools

6.1 MariaDB Enterprise Manager

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date
25.10	October 2025	October 2026	October 2026
26.07	July 2026	April 2027	April 2027
26.10	October 2026	June 2027	June 2027

Supported Versions and Operating Systems for MariaDB Enterprise Server

Operating System		10.6	11.4	11.8	12.3
RHEL	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Rocky Linux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
AlmaLinux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Oracle Linux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04, 24.04, 26.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Debian	12, 13	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
SLES	15	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

Supported Versions and Operating Systems for MariaDB MaxScale

Operating System		23.02 [1]	23.08 [1]	24.02 [1]	25.01 [1]	25.10	26.10
RHEL	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Rocky Linux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
AlmaLinux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Oracle Linux	8, 9, 10	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Ubuntu (LTS)	22.04, 24.04, 26.04	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
Debian	12, 13	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64
SLES	15	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64	X86_64, ARM64

1. Monitoring and Single Sign-On are not supported for MariaDB MaxScale versions below 25.10 while database topologies with those versions could be added and viewed in MariaDB Enterprise Manager

6.2 MariaDB Enterprise Kubernetes Operator

Release Series

Major Version	Stable (GA) Date	End of Standard Support	End of Life Date	Kubernetes versions [1, 2]	CPU architectures [3]	MariaDB Enterprise Server versions [4]	MariaDB MaxScale versions [4]
1.0 (Rolling)	April 2025	February 2026	February 2026	1.30-1.32	X86_64, ARM64	10.6, 11.4	23.08, 24.02, 25.01
25.08 (Rolling)	August 2025	January 2026	January 2026	1.31-1.33	X86_64, ARM64, PPC64LE	10.6, 11.4	23.08, 24.02, 25.01
25.10 (LTS)	October 2025	April 2027	April 2027	1.33-1.35	X86_64, ARM64, PPC64LE	10.6, 11.4, 11.8	23.08, 24.02, 25.01, 25.10
26.03 (Rolling)	March 2026	September 2026	September 2026	1.33-1.35	X86_64, ARM64, PPC64LE	10.6, 11.4, 11.8	23.08, 24.02, 25.01, 25.10
26.06 (Rolling)	June 2026	December 2026	December 2026	1.34-1.36	X86_64, ARM64, PPC64LE	10.6, 11.4, 11.8	23.08, 24.02, 25.01, 25.10
26.10 (LTS)	October 2026	April 2028	April 2028	1.34-1.36	X86_64, ARM64, PPC64LE	10.6, 11.4, 11.8, 12.3	23.08, 24.02, 25.01, 25.10, 26.10

Note: Infrastructure-related issues—such as misconfigured Kubernetes clusters, problems with CSI (storage), CNI (network) drivers—remain outside the scope of support.

1. Three latest Kubernetes versions across all CNCF-certified Kubernetes distributions.
2. End-of-Life (EOL) Kubernetes versions are not supported.
3. Includes MariaDB Enterprise Operator, MariaDB Enterprise Server, and MaxScale docker images.
4. Only MariaDB-provided docker images are supported for use with MariaDB Enterprise Operator.

Validated Container Platforms

While Enterprise Operator is supported with all CNCF-certified Kubernetes distributions, we have additional validation testing and certification (if required) for the selected container platforms:

Version	OpenShift Container Platform [1]
1.0	4.18
25.08	4.16, 4.18
25.10	4.16, 4.18
26.03	4.16, 4.18
26.06	4.18, 4.20, 4.22
26.10	4.18, 4.20, 4.22

1. Certified with RedHat OpenShift.

6.3 MariaDB AI Plugins, Shell, and MCP Server

We use a rolling release model with YY.MM.x version numbers and continuous support. The latest version will always support all MariaDB Enterprise Server releases starting from (11+) and currently under support and customers are always advised to upgrade to the latest version.

Supported Operating Systems

Operating System		CPU Architectures
macOS	27+	ARM64
Windows	11	X86_64, ARM64
RHEL	10+	X86_64
Debian	13	X86_64
Ubuntu (LTS)	26.04	X86_64

6.4 MariaDB GridGain Control Center

Release Series

Version	Stable (GA) Date	End of Standard Support	End of Life Date
2026.1	May 2026	May 2028	May 2028
2026.2	October 2026	October 2028	October 2028

7 Appendix

7.1 Versioning Scheme

MariaDB products follow the following versioning scheme.

Product	Versioning scheme
MariaDB Enterprise Server MariaDB ColumnStore MariaDB MaxScale MariaDB Connector/J MariaDB Connector/R2DBC MariaDB Connector/Node.js MariaDB Connector/C MariaDB Connector/C++ MariaDB Connector/ODBC MariaDB Connector/Python MariaDB Enterprise Operator	• Primary and Secondary numbers together form the "Release Series" • Tertiary: Maintenance release number • Quaternary: Sequence number (where applicable)

- A Release Series (e.g., 10.5 or 10.4 for MariaDB Enterprise Server) is a version supported with an EOL (end of life) and an EOS (end of support) date
- Fixes to issues in a Release Series are provided through new Maintenance Releases
- New features are added together with the release of a new Release Series
- Backward compatibility is not guaranteed between different Compatibility Versions (API compatibility for connectors)
- The typical focus of Maintenance Releases is to provide only bug fixes and to mitigate security issues
- The EOL (end of life) date after which security fixes and maintenance releases are no longer produced
- The EOS (end of standard support) date is after which standard support and common bug fixes are no longer provided; extended support is still available until the EOL date

MariaDB Enterprise Server's version numbering consists of the MariaDB Community Server version number the release is based on plus a sequence number for that release series. For example a version number `10.6.27-23` means that this release of MariaDB Enterprise Server in the 10.6 release series is based on MariaDB Community Server `10.6.27` and is release number `23` in the MariaDB Enterprise Server 10.6 release series Note that MariaDB Enterprise Server releases may skip over a specific MariaDB Community Server maintenance release or have two consecutive releases based on the same community point release (e.g. `11.8.6-3` to `11.8.6-4`).

Release numbering does not indicate the maturity of a release (i.e. Alpha, Beta, Release Candidate or General Availability). Instead, maturity is indicated in the release notes next to the version number (e.g.,

MariaDB Server 10.2.5 Release Candidate). Note that a Release Series is not supported until the GA maturity level is reached.

7.2 Limited Preview and Public Preview (Pre-GA) Product Maturity

Limited Preview

Limited Preview is an early build released to a controlled set of participants to validate direction and gather feedback. Functionality may be incomplete and can change or be withdrawn at any time. Production use is not recommended. There is no SLA for Limited Preview releases; support is provided through direct engagement with Product Management and Engineering via a named channel and is not routed through the support portal.

Public Preview

Public Preview is a feature-complete release open to all customers for real-world testing ahead of production readiness, stable enough for non-production workloads. Production use is not recommended and is at the customer's own risk with no SLA applying. Best-effort support is provided through the standard support portal during business hours (tagged as Preview), and issues are not eligible for Sev-1 or Sev-2 escalation.

7.3 Plugin & Storage Engine Maturity

This Maturity Policy is designed to help recognize what the maturity levels of the plugins and engines mean and what is required for each maturity level. This policy also describes version numbering and the process and conditions for changing the maturity level.

Experimental

The new plugin or storage engine is under development and regularly gets new features, at a fast pace and with little maintenance. New major versions for an existing plugin will always enter Experimental maturity unless the MariaDB plc Server Steering Committee decides otherwise, based on a well-established plugin-focused QA effort.

Beta

The plugin or storage engine is within a cycle where no new major features are added, though some minor features and changes are created. The plugin or storage engine may have open known critical bugs but no "blocker" bugs. The plugin or storage engine may not have a fully defined user experience or complete documentation.

Gamma

The plugin or storage engine is entering a maintenance cycle where no new features are added. The plugin or storage engine could contain known bugs that have documented workarounds. The plugin or storage engine may have a partially defined user experience or incomplete documentation.

Stable

The plugin or storage engine is ready for production usage, has a fully defined user experience, and has complete documentation. It can be loaded by default in MariaDB Enterprise.

A plugin or storage engine can move up only one level in maturity with each minor release of the server (e.g. 10.4.9 to 10.4.10).

Also, a plugin or an engine has its own, independent maturity and can:

- Only be of GA maturity in MariaDB Enterprise Server
- Be of any maturity for a MariaDB Server development release

7.4 Maintenance Releases Schedule

MariaDB Enterprise Server has a fixed release schedule for maintenance releases documented on the mariadb.com website. Generally, MariaDB Enterprise Server will have a new maintenance release once per quarter. Other products typically follow similar cadences.

Release notes will be provided for every released version.

7.5 Product Release Series no longer supported

MariaDB Enterprise Server and MariaDB Galera Cluster

Version	Stable (GA) Date	End of Life Date
10.2	May 2017	May 2022
10.3	May 2018	May 2023
10.4	July 2019	July 2024
10.5	July 2020	July 2025

MariaDB Community Server

Version	Stable (GA) Date	End of Life Date
5.5	April 2012	April 2020
10.0	March 2014	March 2019
10.1	October 2015	October 2020

MariaDB ColumnStore

Version	Stable (GA) Date	End of Life Date
1.0	December 2016	October 2020
1.1	November 2017	November 2020
1.2	December 2018	December 2021
5	July 2020	July 2025
6	August 2021	September 2022
22.08	September 2022	March 2023
23.02	March 2023	September 2023

MariaDB MaxScale

Version	Stable (GA) Date	End of Life Date
2.2	February 2018	January 2020
2.3	December 2018	January 2022
2.4	August 2019	January 2023
2.5	July 2020	January 2024
21.06	August 2021	August 2025
22.08	August 2022	August 2026

MariaDB GridGain

Version	Stable (GA) Date	End of Life Date
8.3	November 2017	November 2019
8.4	April 2018	April 2020
8.5	October 2018	October 2020
8.7	March 2019	December 2021
8.8	December 2020	December 2024

MariaDB Connector/J

Version	Stable (GA) Date	End of Life Date
1.8	February 2019	July 2022
2.2	November 2017	September 2018
2.3	September 2018	January 2019
2.4	January 2019	November 2019
2.5	November 2019	March 2020
2.6	March 2020	September 2020
3.0	January 2022	November 2022
3.2	November 2022	November 2023

MariaDB Connector/R2DBC

Version	Stable (GA) Date	End of Life Date
1.0	January 2020	June 2022
1.1	June 2022	February 2025

MariaDB Connector/ODBC

Version	Stable (GA) Date	End of Life Date
3.0	October 2017	May 2019

MariaDB Connector/C

Version	Stable (GA) Date	End of Life Date
2.3	July 2016	July 2021
3.0	July 2016	June 2019
3.2	July 2021	July 2022

MariaDB Connector/Node.js

Version	Stable (GA) Date	End of Life Date
2.0	January 2019	July 2019
2.1	July 2019	February 2020
2.2	February 2020	March 2020
2.3	March 2020	May 2020
2.4	May 2020	October 2020
2.5	October 2020	May 2024
3.0	February 2022	February 2023
3.1	February 2023	August 2023

MariaDB Connector/Python

Version	Stable (GA) Date	End of Life Date
1.0	June 2020	October 2024

7.6 Security Bug Fixing Policy

MariaDB Engineering classifies all security bugs according to their threat level. The threat level can be one of two possibilities:

- **Critical bugs** contain an exploitable vulnerability that causes arbitrary code execution or allows an unauthenticated user to crash the server or gain access to data
- **Medium bugs** are all bugs that are not classified at the critical level

We strive to fix:

- Any **Critical security bug** immediately and release fixed MariaDB binaries for all supported MariaDB versions as soon as possible, usually within two weeks
- **Medium security bugs** as soon as possible, but we will not change our planned release schedule to get the fix out earlier
- Any **actively exploited security bugs** immediately and release fixed MariaDB binaries for all supported MariaDB versions as soon as possible, usually within two weeks

7.7 Engineering Policy Changes

Updated in this policy version:

- Removed Debian 11
- Added Debian 12 and 13 to MariaDB Connector/ODBC, Connector/C, and Connector/C++

- Added RHEL 10, Rocky Linux 10, and AlmaLinux 10 to MariaDB Connector/ODBC, Connector/C, and Connector/C++
- Added Ubuntu 26.04 to MariaDB Connector/ODBC, Connector/C, and Connector/C++
- Added MariaDB Enterprise Server 12.3
- Renamed MariaDB Enterprise Cluster to MariaDB Galera Cluster / MariaDB Raft Cluster in the table of components with limited OS coverage
- Added MariaDB Enterprise ColumnStore 23.02, and Ubuntu 26.04 for MariaDB Enterprise ColumnStore
- Added MariaDB MaxScale 26.10
- Moved MariaDB MaxScale 22.08, which reached its end of life in August 2026, to Product Release Series no longer supported
- Added MariaDB Connector/J 4.0
- Added MariaDB Connector/R2DBC 1.4, and Java 25 for MariaDB Connector/R2DBC
- Added MariaDB Enterprise Manager 26.10, and MariaDB Enterprise Server 12.3, MariaDB MaxScale 26.10, Ubuntu 26.04, and SLES 15 for MariaDB Enterprise Manager
- Replaced the CPU architectures column with End of Standard Support in the MariaDB Enterprise Manager release series
- Added MariaDB Enterprise Kubernetes Operator 26.10, End of Standard Support dates for MariaDB Enterprise Kubernetes Operator, and OpenShift 4.20 and 4.22 for MariaDB Enterprise Kubernetes Operator 26.06 and 26.10
- Renamed MariaDB MCP Server to MariaDB AI Plugins, Shell, and MCP Server, with a rolling release model
- Added macOS, Windows, Debian 13, RHEL 10, and Ubuntu 26.04 for Enterprise MCP Server, replacing RHEL 9 and Ubuntu 24.04
- Added MariaDB GridGain Control Center 2026.2
- Added Limited Preview and Public Preview (Pre-GA) Product Maturity
- Renamed MariaDB Enterprise Cluster to MariaDB Galera Cluster in Product Release Series no longer supported
- Added that MariaDB plc maintains a fork of, or replaces, a bundled third-party package that becomes unmaintained upstream
- Added a MariaDB Community Server section, stating that it is excluded from the Supported Products
- Added MariaDB GridGain 8.10
- Changed the Security Bug Fixing Policy: Critical security bugs are fixed for all supported MariaDB versions, usually within two weeks, and actively exploited security bugs are fixed the same way

- Replaced the Subscription Services Policy with the Support Policy
- Changed the support for Platforms not listed as supported to commercially reasonable effort support
- Removed the plugin and storage engine maturity rule for GA versions of MariaDB Community Server
- Corrected the dates of MariaDB Connector/C++ 1.0 and 1.1, and the Stable (GA) dates of MariaDB Connector/Node.js 3.2 and 3.5
